Grade 9 Social Sciences Teachers Guide | Document Read Online - Skin effect is the tendency of an alternating electric current (AC) to become distributed within a conductor such that the current density is largest near the surface of the conductor, and decreases with greater depths in the conductor.
Tue, 15 May 2018 21:23:00 GMT
Skin effect - Wikipedia - The speed at which energy or signals travel down a cable is actually the speed of the electromagnetic wave in the insulating material between the conductors, not the movement of electrons.
Sun, 13 May 2018 17:01:00 GMT
Speed of electricity - Wikipedia - Academia.edu is a platform for academics to share research papers.
